

# Operating manual of MaxProAir

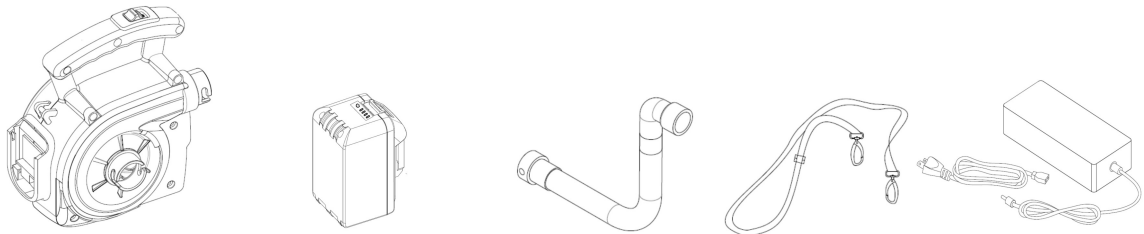

## 1. Product

MaxProAir

## 2. Intended Use

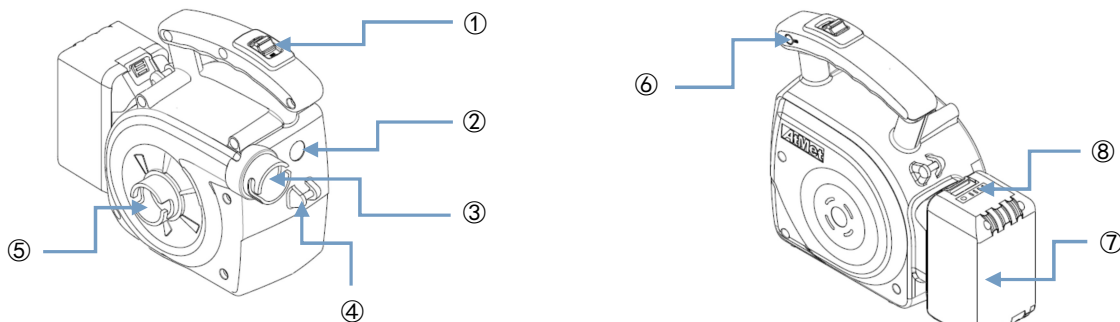

This MaxProair is intended for inflating/deflating Dunnage Airbag.

## 3. Includes

① Inflator x1    ② Lithium Battery x1    ③ Flexible Hose x1    ④ Strapx1    ⑤ Charger x1

## 4. Parts List

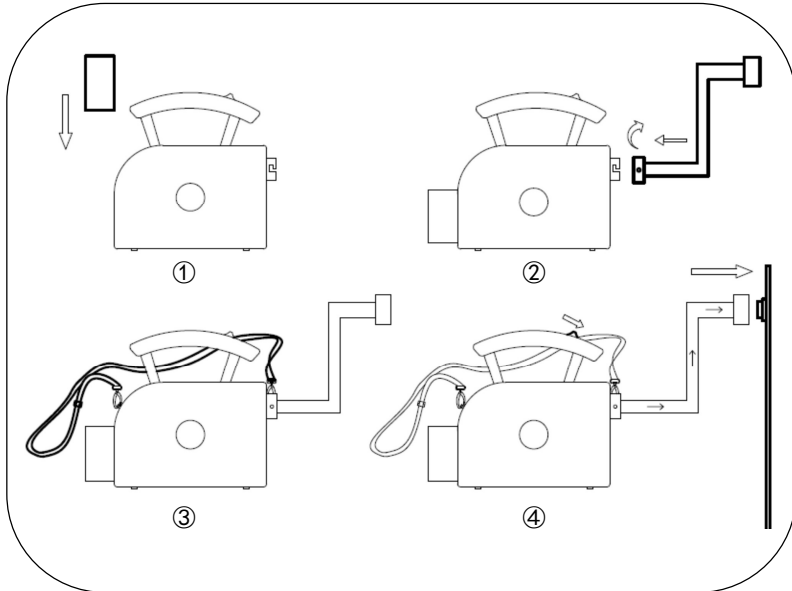

①: Switch    ②: LED Light    ③: Inflation port    ④: Strap holder  
 ⑤: Deflation port    ⑥: LED Switch    ⑦: Battery    ⑧: Battery Level Indicator

## 5. Technical Parameters

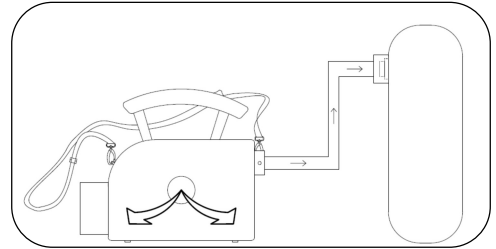

Weight (kg Include Battery)	Air Flow (m <sup>3</sup> /h)	Battery voltage/ capacity	Recharging time (h)
2.45	70	24V/5.2Ah	4

## 6. Operating Instructions

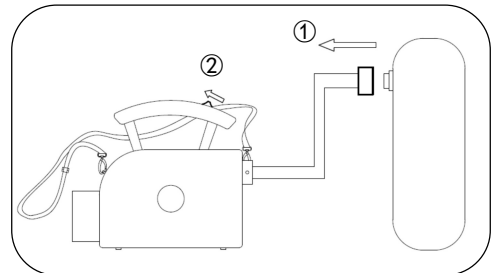

### Installation and Inflation

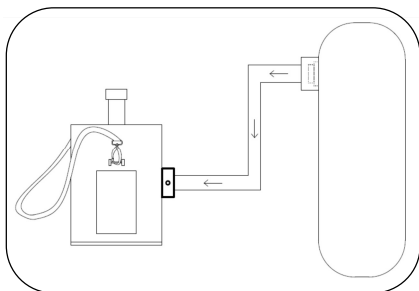

### Reminder of completion of inflation

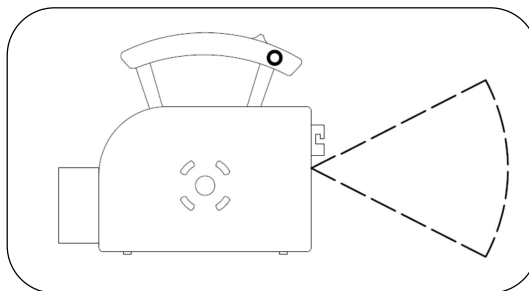

Disconnect the valve from the bag then turn off the inflator

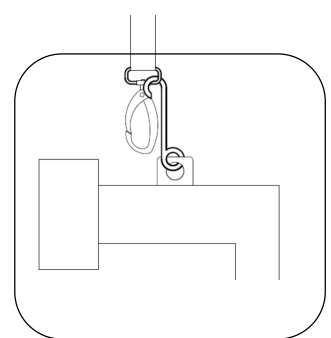

### Deflation

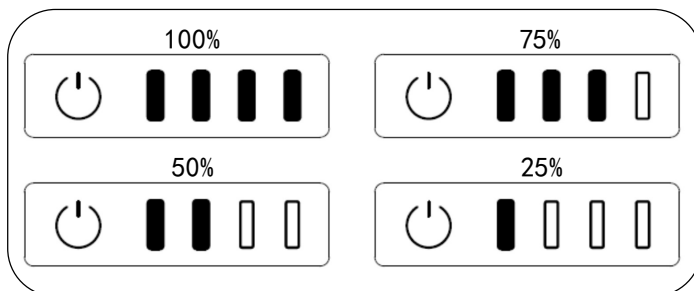

### Lighting

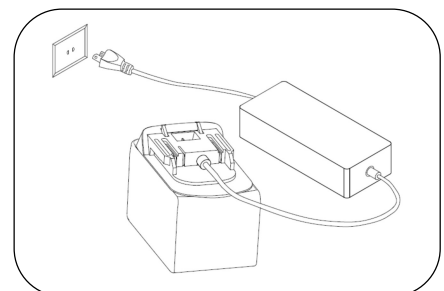

### Inflator head can be held by the strap

### Power Display

### Charger

## 7. Important safety notes

1. Ensure that battery and inflator are properly connected before each use.
2. Before operating, check your battery level.
3. Disconnect the battery and turn off LED light when inflator is not in use.
4. Do not operate your inflator in rainy environment.
5. The air vents must never be blocked during inflating.
6. In order to avoid short-circuiting and burning the circuit board, please turn off the red switch on the handle before replacing the battery.
